

# ZETA SYSTEM FTS THICKNESS: 38MM

The Zeta System FTS flooring system features a wood surface with an FTS shock-absorbing underlayment. The right choreography, rhythm, and spirit can help make group exercise fun and beneficial; Zeta System FTS combines the look of wood parquet with a uniform elastic response for both performance and comfort.

## CERTIFICATIONS

- REACH compliant
- UNI EN ISO 9001
- CE marked product (EN 14904 incl DoP)
- A3 elasticity level (EN 14904)
- Fire EUROCLASS Cfl-S1 n 13501)

# ZETA SYSTEM FTS THICKNESS: 38MM

Perfect for:

- Holistic Fitness Classes
- Yoga
- Pilates
- Training
- Mobility and Stability work-outs
- Suspension training
- Dance

Thickness: 38mm  
Weight: 19.8 kg/m<sup>2</sup>

## PERFORMANCE & SAFETY

Zeta System FTS consistently provide the perfect balance of energy return, shock absorption, and vertical deformation thanks to a pre-manufactured elastic underlayment made with granules from post-consumer recycled materials. The system is recommended for facilities with underfloor heating systems, because the product provides homogenous and continuous heat diffusion on the surface.
