## Perfect for:

- Common areas
- Locker rooms
- Ancillary Areas
- High traffic areas
- Cardio areas

University of Manitoba, USA

## PERFORMANCE & SAFETY

The 2 mm thick rubber wear layer can withstand the wear and tear caused by loads and slight abrasions. The non-porous surface is easily maintained, and since it is non-slip, it provides optimum grip for all workouts, even those conducted with minimal footwear or bare feet. The combination of wear layer and 2 mm thick underlayment guarantees perfect dimensional stability and makes Reflex ideal for a wide range of workouts, including floor exercises.
