- The Rubber Range Environmental Product Declarations (EPD) for Life Cycle Analysis show the products have 19% less impact on the environment than similar PVC products
- Fire EUROCLASS (EN 13501)
- CE marked product (EN 14041 / EN 14094 incl DoP)
- UNI EN ISO 9001

LOW VOC EMISSIONS

Better air quality means better performances for athletes

WE INNOVATE.YOU WIN

GREENGUARD GOLD CERTIFICATION

Air pollution can have a negative effect on athletes' performance and put their health at risk. During training and competition, athletes breathe 20 times more than they would normally. This means that they are 20 times more exposed to pollution risks. That is why mondo has been striving for years to achieve low VOC emissions and have that confirmed by independent external laboratories, such as UL Environment, which has given our surfaces GREENGUARD GOLD Certification, or by accredited laboratories, which have awarded them class A+ according to the French Decree.
