

VINYLSPORT M EVERLAY

PVC sports flooring for indoor use, supplied in rolls with a constant total thickness of 7mm.

The flooring is consisting of an embossed wear layer with protective treatment provided with solid color or wood effect, a high density fiberglass-reinforced layer and an expanded dual-density vinyl foam backing.

The prefabricated layer is paired on-site with a membrane of 1,2mm. thickness provided in rolls. The fibre glass underlayment, treated on both sides with synthetic elastomeric resins, is dimensional stable, moisture resistant and provides insulating properties. This product has been certified to be in compliance

with European Standards EN 13984 ("Flexible sheets for waterproofing") including Declaration Of Performance (DoP, CE marking).

The two layers are coupled together, using an appropriate adhesive, to provide a loose laid system with a uniform thickness of 8,75 mm.

The combination of the underlayment not only guarantees the stability of the system while providing complete protection against high humidity rates coming from subfloor, which significantly extends the product life. The underside of the membrane has a series of stems in expanded resin that improve the overall stability of the flooring system.

This product is ideal for a multisport indoor hall where different indoor sport competitions are held, such of basketball, handball, volleyball, badminton or futsal.

STANDARDS

This product has been certified to be in compliance with European Standards EN 14904 ("Surfaces for sports areas - Multi-sports floor systems for indoor use", Shock absorption ≥ 25 , Class P1) including Declaration Of Performance (DoP, CE marking) and it is rated Euroclass Cfl-S1 in accordance with EN 13501.

This product has been certified in compliance with the following schemes and standards for Indoor Air Quality programs (VOC, Volatile Organic Compounds emissions):

- French scope (2011-321): Class A+.
- Italian regulation CAM (Minimum Environmental Criteria) following D.M. 11/01/2017.

This product has been rated "Non Hazardous" by external laboratory in accordance with the European Waste Catalogue. This means that it does not present a subrisk to public health or cause adverse effects on the environment.

This article is produced in compliance with the European Regulation REACH (Registration, Evaluation, Authorization and Restriction of Chemicals).

This product is designed and manufactured according to UNI EN ISO 9001 certification.
