

## Pole Vault Landing Area 8.00 x 6.00 x 0.80

**AE333 - AE325 - AE306 - AE320 - AE336**

Designed and manufactured in accordance with, and certified under, the Regulations of the International Federation (IAAF Certificate E-99-0197).

The landing area consists of several modules and of a spike resistant mattress that covers its entire top surface.

The modules are made from four layers of foam rubber. The lower and upper solid layer is 100mm thick. The two intermediate layers are equipped, on one side, with grooves of 250mm x 250mm square section. It is alternated with solid portions of the same size; the two layers are stacked together with the grooves facing each other, in crosswise direction, in order to minimize the contact area. The modules facing the runway, adjacent to the pole vault box, are fabricated from solid blocks of polyurethane foam. The modules are covered with PVC-coated polyester and provided with zippers.

The spike resistant mattress is 100mm thick, and is covered with suitable spike resistant material and provides uniformity to the surface and better absorption of the first impact from the fall of the athlete.

Consists of 7 modules.

Total dimensions: 8.00 x 6.00 x 0.80m
