

Lane Marker Box

AC121 - AC122

Made of fiberglass-reinforced polyester. Perfectly stackable.

The surface is perfectly smooth with the color built into the material throughout the thickness of the product in order to reduce maintenance. A reinforcement strip along the lower perimeter gives rigidity and stability to the product.

The top of the box is equipped with holes that facilitate transport and allow the introduction of the false start and disqualification indicators (false start and disqualification indicators AC131 supplied separately).

The numbering is made with stickers applied to each of the three sides of the box.

SALES UNIT

AC121 Set of 6 Units (6 Lanes)

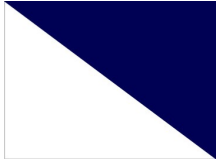

AC122 Set of 8 Units (8 Lanes)
