

## Additional advertising module

### ME0PL3

Additional advertising module, that can be fixed below some MONDO electronic indoor multi-sport scoreboards. It is compatible with the models ORION, ANTARES and FENIX.

It has a metal structure, manufactured in a 1.5 mm thick steel plate, which makes it highly resistant.

This module is fixed to the bottom of the scoreboard with screws.

An impact resistant opal white methacrylate front plate is fixed to the front of the metal structure, where the advertising logo or chosen design has been screen-printed.

For a better visibility, the advertising module is internally lit up with several 40 W fluorescent tubes placed inside the module behind the opal white methacrylate sheet. The power supply of the advertising module is independent from the main scoreboard.
