

Circular Modular Award Stand

AV030

The awards stand consists of three independent steel structures of various heights (50, 37.5 and 25 cm), designed so that they can be inserted one inside the other in order to save space when not in use. When inserted one inside the other, they occupy a circular area with a diameter of 110 cm.

The floor is fabricated from knurled aluminum plate.

After a degreasing treatment, consisting of a pressured phosphate bath, the steel structure is painted with polyester powder paint and polymerized at 200°C in an oven.
