

Run-up Markers

AT260

Run-up markers are used by athletes as check marks during long jump, triple jump, pole vault and javelin events.

They are made available in different colors allowing the athlete to easily recognize his own mark.

They are built by welding together two steel plates of circular shape with a diameter of 60 mm.

After a degreasing treatment, consisting of a pressured phosphate bath, the product is painted with polyester powder paint and polymerized at 200° C in an oven.

SALES UNIT

Set of 12 pieces.
