

REFLEX HP

THE HIGHLY VERSATILE FLOORING SOLUTION.

REFLEX HP IS A HIGHLY VERSATILE, DOUBLE-LAYERED, VULCANISED RUBBER FLOOR WITH A HAMMERED SURFACE FINISH.

CO-VULCANIZED MULTI-LAYER DUAL DUROMETER

Our sport surfaces are made from two layers of solid rubber vulcanized together to form a continuous, seamless surface.

REFLEX HP

In both the training areas and changing rooms, fitness centres need comfortable, versatile surfaces that are ideal for bodyweight exercises and heavy traffic.

Reflex HP is the perfect solution for all the flooring in a fitness centre, except for the free-weight areas.

FROM THE FITNESS CLASSES TO THE CHANGING ROOMS.

With its double-layer structure, Reflex HP is a floor that offers an ideal solution for the various spaces in a fitness centre, including the running and changing rooms, and the callisthenics and communal areas.

The 2 mm thick rubber wear layer can withstand the wear and tear caused by loads and slight abrasions. The non-porous surface is easily maintained, and since it is non-slip, it provides optimum grip for all workouts, even those conducted with minimal footwear or bare feet. The combination of wear layer and 2 mm thick underlayment guarantees perfect dimensional stability and makes Reflex ideal for a wide range of workouts, including floor exercises.

The Reflex HP colour range was designed to work with Ramflex, the MONDO floor surface fitness centres can use with Reflex in the free-weight areas.
