

MODULE TWO LANES ATHLETIC TRACK

This module has been designed for track sprinting in two lanes.

The start area and deceleration area after the finish line are standard and sized according to track and field federation rules.

The total length of the track is customizable and can be adapted to the available space.

CONTEXT

Sports equipment does not have to be moved to accommodate this configuration, so this module can be placed in supervised or unsupervised areas.

DIMENSIONS

Minimum recommended dimensions of the module including safety areas: 4.60 m width x variable length.
