

# NSF 70 A

FUN THAT LASTS OVER TIME.

**NSF 70 A IS A NEXT-GENERATION ARTIFICIAL TURF SYSTEM COMPOSED OF POLYPROPYLENE NSF FIBRILLATED FILAMENTS AND SILICON SAND INFILL.**

#### **NSF FIBRILLATED FIBERS**

Fibrillated polypropylene artificial turf fiber with progressive fibrillation alignment model

#### **BACKING WITH POLYURETHANE COATING**

During the manufacturing process of Mondoturf layers, fibers are woven on a double-layer polypropylene backing and affixed with a polyurethane application.

## NSF 70 A

Padel tennis courts can be subjected to intense use—especially if they’re used for doubles, too. With MONDO NSF turf, standing up to heavy use isn’t a problem.

## FIBRILLATED POLYPROPYLENE MONDOTURF: OPTIMIZED FIBRILLATION

MONDO ‘s exclusive progressive fibrillation alignment model includes a thicker cutting sequence and greater cutting length, both of which improves the fiber’s appearance and durability. Compared with traditional fibrillated fibers, Mondoturf fibers in synthetic turf fields maintain optimal friction, resilience, and abrasion resistance longer.

## MONDOTURF NSF 70 12 A

**Filaments Type:** straight fibrillated filaments

**Pile height:** 12 mm

**Yarn Dtex:** 7,000 Dtex

**Infill:** Sand
