

NSF 70 A

A REGULAR BOUNCE, CONSISTENTLY.

NSF 70 A IS AN ARTIFICIAL TURF SYSTEM COMPOSED OF POLYPROPYLENE NSF FIBRILLATED FILAMENTS (7.000 DTEX) AND SAND INFILL.

BACKING WITH POLYURETHANE COATING

During the manufacturing process of Mondoturf layers, fibers are woven on a double-layer polypropylene backing and affixed with a polyurethane application.

NSF 70 A

The Mondoturf surface ensures a regular, consistent ball bounce—an advantage for players at any level.

FIBRILLATED POLYPROPYLENE MONDOTURF: OPTIMIZED FIBRILLATION.

MONDO 's exclusive progressive fibrillation alignment model includes a thicker cutting sequence and greater cutting length which improves the fiber's appearance and durability. Compared with traditional fibrillated fibers, Mondoturf fibers in synthetic turf fields maintain optimal friction, resilience, and abrasion resistance longer.

MONDOTURF NSF 70 15 A

Filaments Type: straight fibrillated filaments

Pile height: 15 mm

Yarn Dtex:7,000 Dtex

Infill: Sand
