

NSF 66 15 A

NSF 66 15 A: A REGULAR BOUNCE, CONSISTENTLY.

NSF 66 15 A IS A NEXT-GENERATION ARTIFICIAL TURF SYSTEM COMPOSED OF POLYPROPYLENE NSF FIBRILLATED FILAMENTS AND SAND INFILL.

BACKING WITH POLYURETHANE COATING

During the manufacturing process of Mondoturf layers, fibres are woven on a double-layer polypropylene backing and affixed with a polyurethane application.

NSF 66 15 A

The Mondoturf surface ensures a regular, consistent ball bounce—an advantage for players at any level.

FIBRILLATED POLYPROPYLENE MONDOTURF: OPTIMIZED FIBRILLATION.

MONDO 's exclusive progressive fibrillation alignment model includes a thicker cutting sequence and greater cutting length which improves the fiber's appearance and durability. Compared with traditional fibrillated fibers, Mondoturf fibers in synthetic turf fields maintain optimal friction, resilience, and abrasion resistance longer.
