

MONDOTEN

THE ULTIMATE TENNIS SURFACE.

MONDOTEN IS A UNIQUE, FACTORY-ENGINEERED, HIGH-PERFORMANCE SYSTEM WITH TWO PRIMARY COMPONENTS: AN ACRYLIC COATING SYSTEM AND A SHOCK ABSORPTION LAYER. COMBINED, THEY PROVIDE CONSISTENT AND TRUE BALL BOUNCE FOR THE LIFE OF THE SURFACE.

Due to Mondoten's composition and its multi-layer structure, the flooring is perfect for indoor or outdoor facilities, permanent or temporary installations, and competitive or recreational play. Whatever the setting, Mondoten is the surface for athletes who want to play at the top of their game.

SLIP-RESISTANT, COMFORTABLE, SAFE

Mondoten guarantees excellent grip and traction in all weather conditions. The pre-manufactured shock absorption layer provides optimal comfort, and the surface is biomechanically engineered to reduce player fatigue and minimize the risk of injury.

CONSISTENT, CUSTOMIZED PERFORMANCE

Mondoten's acrylic coating system provides true bounce and uniform ball response across the entire surface. The system is ITF rated and engineered for amateurs and pros alike.

MADE TO WIN, MADE TO LAST

Mondoten is a long-lasting flooring system with a 5-year warranty. It's suitable for both concrete and asphalt surfaces, and it's very easy to install in place of existing surfaces, including clay, indoor carpet, and acrylic hard courts, making it an excellent choice for renovation projects.
